From Insight to Action — Instantly

Equip your **procurement and planning teams** with **instant insights & predictive foresight**. **No ERP replacement needed**: this intelligent agent connects to your existing systems, delivering SKU-level forecasting, scenario planning, and prescriptive decision support at a fraction of the cost.

Financial Impact

-  Optimize procurement, production & inventory across SKUs
-  Reduce excess inventory & free up working capital
-  Minimize stockouts & emergency purchases
-  Improve on-time delivery (OTD) & forecasting accuracy
-  Gain agility in volatile markets — react to shifts in seconds, not weeks

The Technological Advantage

ERP & System Enhancer

-  Adds predictive AI to your ERP—avoids costly upgrades and unlocks real-time, SKU-level demand forecasting.

Real-Time Forecasting Engine

-  Predicts demand shifts using internal & external signals (sales, weather, supplier issues, etc.).

Autonomous Planning Assistant

-  Recommends safety stock and purchase quantities—aligned with internal policies and instantly adjustable.

Risk Mitigation Layer

-  Flags abnormal lead times, supplier issues, and market anomalies before they disrupt operations.

Seamless Integration

-  Connects securely to SAP, Microsoft, Oracle & more.

Continuous Learning Loop

-  The more it runs, the smarter it gets—refining accuracy & adapting to new data instantly.
